Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/759,500	Applicant(s) PENN ET AL.	
	Examiner Hugh B. Thompson II	Art Unit 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Ehrenleitner #6,991,064. Ehrenleitner discloses frame members 11-14, an external mounting surface of 13 engageable with a horizontal support track (support surface-unnumbered), parallel drive mechanisms/lift drums 15-18, located internally within the frame, tethers/cables (known to be braided) 19-22, which are attached to platform 4 to raise the platform in a vertical direction, and drive motors, as recited in column 4, lines 28-30.

Allowable Subject Matter

Claims 21-40 are allowed.

Claims 4-6, 8, 10-13, and 15-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The primary reason for the allowance of claim 21 is the inclusion of at least one drive pulley the first shaft being operatively coupled to the second shaft to permit simultaneous rotation of the first and second shaft.

Art Unit: 3634

For claim 4, it is the inclusion of each shaft having a drive pulley and a drive belt coupled to drive each drive pulley.

For claim 6, it is the inclusion of at least one extension idler in association with the lift drum that shifts horizontal position of the respective lift tether.

For claim 7, it is the platform forming a basket.

For claim 8, it is the inclusion of a foldable fence connected to the vertical walls.

For claim 9, it is the inclusion of each tether having a releasable fastener coupled to a corresponding member on the platform.

For claim 10, it is the inclusion of the platform having a seal providing a barrier between the platform and frame when the platform is in the raised position.

For claim 11, it is the inclusion of at least one tensioner associated with the lift drum and in contact with a respective tether to prevent twisting or kinking of the tether as it is wound or unwound from the lift drum.

For claim 15 it is the inclusion of the parallel shafts being vertically offset with respect to each other and the drive mechanism driving each shaft in opposite rotational directions.

For claim 16, it is the inclusion of at least one lift drum having an idler lift drum coupled to a drive pulley of another shaft to communicate rotational movement between shafts.

For claims 17 and 18, it is the inclusion of a means coupled to the underside of the platform for detecting impact of the platform on an object, that means as provided for on page 17, lines 15-29.

For claim 20 it is the inclusion of a retractable wheel coupled to an underside of the platform.

Art Unit: 3634

The prior art of record fails to teach or suggest the claimed features absent the applicants' own disclosure.

Response to Arguments

Applicant's arguments with respect to claim 1 has been considered but is moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Specifically, the applicant has now recited the external mounting surface adapted to fixedly engage an opening provided in a horizontal supporting surface. See claim 1. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
